EDUCATION

Bachelor of Computer Science (Third Year) University of British Columbia	September 2024 – December 2027
Advanced Diploma – Clinical Genetics (88%) British Columbia Institute of Technology	August 2020 – October 2021
Bachelor of Health Sciences (Dean's Honour Roll) Simon Fraser University	September 2011 – December 2017

PROFESSIONAL EXPERIENCE

UBC Faculty of Applied Sciences – Front-End Web Developer Vancouver, B.C.	May 2026 – Present
- Support the maintenance and enhancement of 9 Drupal-based departmental websites, using DDEV local/staging deployment workflows to improve content presentation and usability - Resolve frontend support Jira tickets involving Tailwind CSS UI adjustments, module updates, configuration synchronization and metadata mapping to support SEO and event discoverability	
CIHI – Applied Architecture Software Developer Intern North York, O.N.	January 2026 – April 2026
- Migrated 3 enterprise Java monoliths from Spring to Spring Boot, refactoring 20+ Maven dependencies and converting XML configurations (i.e., Spring Security) to Java-based configs, improving cloud deployment stability on Amazon EKS - Resolved containerization failures by replacing legacy JSP views with Thymeleaf, and automated Docker image builds with Bamboo CI/CD, reducing build and debugging time by > 90% - Improved overall test coverage across applications to 88% using Mockito and JUnit Jupiter with more comprehensive unit tests, improving confidence in application behaviour during migration - Built a responsive internal knowledge repository using HTML5, CSS3, and JavaScript, outlining migration and troubleshooting workflows to improve team onboarding efficiency and knowledge transfer for a 20+ member team - Contributed to an AWS Bedrock proof-of-concept to evaluate the usage of a multi-agent and human-in-the-loop validation workflow for automated logical data modelling	
Shared Services Canada – I.T. Analyst Co-op Student Vancouver, B.C.	August 2025 – December 2025
- Delivered Windows 11 imaging and endpoint deployment workflows, supporting enterprise user device management through Azure, MDM and MECM/SCCM, leveraging PowerShell for automated account provisioning - Developed an internal automation tool with Python, Tkinter and Selenium, streamlining workflows with reduced manual data entry errors and Excel template auto-population, improving ticket completion speed by 75% - Authored a 60+ paged training guide standardizing support procedures, adopted as a core onboarding resource for new co-ops across regional support teams	

TECHNICAL PROJECTS

PassPing <i>React.js, Vite, TypeScript, Chrome APIs</i> GitHub	March 2026 – Present
Prototyped a Manifest V3 Chrome extension using service workers and Chrome APIs to automate student bus pass renewal reminders, persisting user settings via chrome.storage	
OverHacked! <i>Phaser.js, Next.js, FastAPI, LangChain</i> GitHub	January 2026 – January 2026
Built FastAPI backend endpoints, integrating OpenAI LLMs with CrewAI to dynamically generate programming quiz content for game interactions	
AniMori <i>Electron.js, React, Vite, SQLite, Node.js, Jikan</i> GitHub	August 2025 – December 2025
Developed a cross-platform Electron.js desktop anime-tracking app using React and SQLite, with automated metadata retrieval via the Jikan API, with IPC client-to-backend communication	
JobQuest AI <i>Next.js, AWS Bedrock, ElevenLabs</i> GitHub	October 2025 – October 2025
Designed a gamified job search assistant using Next.js, implementing AI-powered resume reviews and mock behavioural interview features using AWS Bedrock and ElevenLabs	

TECHNICAL SKILLS

Languages | Python, Java, SQL, R, HTML5, CSS3, JavaScript
Frameworks/Libraries | React.js, Node.js/Express.js, Next.js, Electron.js, Spring Boot, JUnit, Mockito, FastAPI
Databases | PostgreSQL, MongoDB (NoSQL), SQLite, H2
Cloud & DevOps | Docker, JFrog Artifactory, Amazon Web Services (ECR, EKS)
Relevant Tools | GitLab, Bamboo, Jira, Postman, Vite, Jupyter, Selenium, Microsoft Azure (MDM, MECM/SCCM)
